## Carbon Technologie aus der österreichischen Edelschmiede

Es gibt ein Material, das mehr leistet als andere. Ein Hochleistungswerkstoff, mit dem ein Unternehmen arbeitet wie kaum ein anderes. XeNTiS fertigt aus Carbon, Rims, Wheels und Komponenten in unnachahmlicher Form und Funktion.

XeNTiS ist mit dem Anspruch angetreten, neue Maßstäbe zu setzen. Jahrelanges Know-how im Umgang mit Carbon fließt in die größtenteils manuelle Fertigung ein.

Unverzichtbar sind dabei die Erfahrungen erfolgreicher Athleten. Sie treiben die permanente Entwicklung von Wheels und Komponenten voran. So wurden die Squad SL Modelle in Zusammenarbeit mit dem besten österreichischen Radrennenteam (Team Felbermayr-Simplon Wels) realisiert.

Die Umsetzung erfolgt mittels CAD und FE Berechnungssysteme. Prototypen werden konstruiert und analysiert.

Erst wenn die entsprechenden Ergebnisse vorliegen, kommen die neuen Wheels zu den computergestützten Aerodynamik Tests, die abschließend mit Ergebnissen des Prototypen aus dem Windkanal überprüft werden.

## Carbon Technology from the Austrian high end manufacturer

There is a material that performs better compared to others. Carbon composite is a high-end performance material. XeNTiS uses it to produce carbon wheels, rims and components unlike any other.

XeNTiS claims to set new standards. Many years of expertise in dealing with carbon flows into the largely hand crafted production lines.

Essential are also the experiences of successful athletes as they are the drive behind the permanent development of XeNTiS wheels and components. The Squad SL is the result of a close cooperation with the leading Continental-Racing Team Felbermayr-Simplon Wels from Austria. The implementation takes place by means of CAD and FE calculation systems, then prototypes are constructed and further analyzed.

Only if the relevant results meet or exceed expectations, the data will be transmitted to the computerized aerodynamic test bench and finally the result are directly compared to the result of the prototype in the wind tunnel.

Die patentierte Bremsfläche von XeNTiS garantiert beste Bremsperformance bei nassen und trockenen Bedingungen. Es kommt zu keinem Verschleiß der Bremsfläche.

The patented brake surface guarantees the best brake performance in wet and dry conditions. No wear-out on the brake surface.

XeNTiS verbessert die Aerodynamik durch den ACTIVE TURBULATOR (Welle).

XeNTiS improves aerodynamics using the ACTIVE TURBULATOR (Wave)

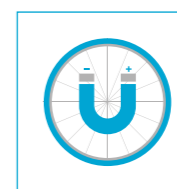

XeNTiS Wheels werden zu 100% in Österreich gefertigt und verfügen über einen RFID Chip. Dieser garantiert die Nachverfolgbarkeit von Herkunft und Herstellung.

XeNTiS wheels are 100% hand made in Austria. All wheels are fitted with a unique RFID chip that allow exact information to be traced and extracted such as origin and manufacturing specifications.

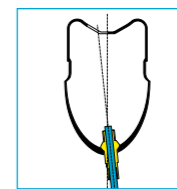

XeNTiS Squad SL und Monocoque Wheels werden lackiert und sind daher UV-beständig.

XeNTiS Squad SL and monocoque wheels are coated and therefore UV protected.

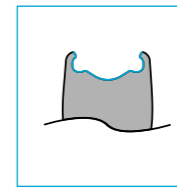

XeNTiS Wheels sind ausbalanciert und verfügen über einen integrierten Tachomagneten. (kein Tachomagnet in den Modellen RACE 2.5 und SL 2.5)

XeNTiS wheels are harmonically balanced and feature an integrated tachometer magnet. (No tachometer magnet in RACE 2.5 and SL 2.5)

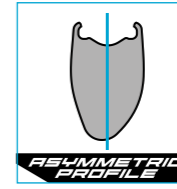

Aufgrund von XeNTiS Spezialbohrungen im Inneren der Felge wird eine sehr hohe Haltbarkeit und eine optimale und langlebige Kraftübertragung garantiert. Durch diese Bearbeitung wird das Eindringen von Wasser in die Felge verhindert.

Due to the XeNTiS offset holes inside the rim, the durability of XeNTiS wheels is very high. These holes guarantee an optimal and durable power transfer and this process prevents penetration of water into the rim.

Durch das TUBELESS READY System können alle XeNTiS Clincher Laufäder ohne Schlauch gefahren werden. Aufgrund der speziellen Felgenbettgeometrie sitzt der Reifen exakt im Felgenhorn. Der Einsatz dieses Systems erhöht wesentlich die Pannensicherheit und den Komfort.

Due to the TUBELESS READY system all XeNTiS clincher wheels are rideable without an inner tube. Because of the special rim base the tyre fits exactly to the rim flange. This application guarantees a significant increase in puncture protection and riding comfort.

Der ASYMMETRISCHE FELGENQUERSCHNITT kommt bei Hinterrad- und Scheibenbremsnaben zum Einsatz, nähert die Speichenspannung links und rechts aneinander an und erhöht dadurch die Seitensteifigkeit des gesamten Laufrades.

The ASYMMETRIC RIM PROFILE is used in combination with rear and disc-brake hubs. As a result, the spoke tension left and right is almost equal and therefore the lateral stiffness of the entire wheel increases.

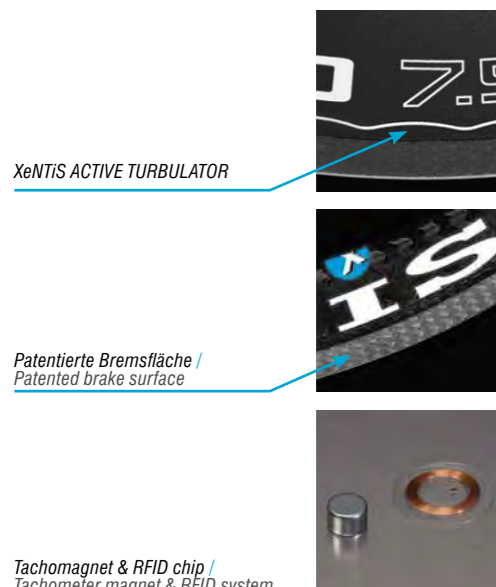

# PATENTED BRAKE SURFACE

## Patentierte XeNTiS Bremsperformance (XBP)

Die patentierte Bremsfläche von XeNTiS garantiert beste Bremsperformance bei nassen und trockenen Bedingungen. Es kommt zu keinem Verschleiß der Bremsfläche und neben den XeNTiS Bremsbelägen ist auch die Verwendung von Standardbremsbelägen möglich.

## Patented XeNTiS brake performance (XBP)

The patented brake surface guarantees the best brake performance in wet and dry conditions. No wear-out on brake surfaces and in addition to XeNTiS brake pads, standard brake pads can be used too.

- 11 Kunstharz / synthetic resin
- 16 Schleifscheiben (topfförmig) / grinding disc (cup-shaped)
- 17 Schnitt durch Schleifscheibe / profile of grinding disc

## Squad Race

SQUAD Race ist die neue Serie von XeNTiS und ersetzt die Modellreihe XBL. Diese Modelle sind in drei verschiedenen Felgenhöhen (25, 42 und 58 mm) und jeweils als Clincher mit tubeless ready System und als Tubular Variante erhältlich.

Das größte Novum im Vergleich zur XBL Modellreihe ist die Anhebung der Felgenbreite auf 26 mm. Zusätzlich kommen erstmalig asymmetrische Felgenprofile zum Einsatz welche die Seitensteifigkeit erhöhen.

Durch die Zusammenarbeit mit DT Swiss sind diese Laufräder wahlweise mit Naben des Schweizer Qualitätsherstellers in den Ausführungen Felgenbremse und Scheibenbremse (Centerlock) erhältlich.

## Relaunch der Squad SL Serie

Die SL Modelle sind in vier Felgenhöhen (25, 42, 58 und 75 mm) als Clincher mit tubeless ready System und als Tubular Variante (ausgenommen 75 mm) erhältlich.

Neben der bei XeNTiS hausintern entwickelten und produzierten Carbonnabe (Vorderrad) wird bei der Hinterrad Nabe, wie bei der Race Linie, auf DT Swiss gesetzt.

Zur unkomplizierten Wartung der Laufräder sind diese mit außenliegenden Nippeln versehen.

## Relaunch der Squad MTB 29er Serie

Zusätzlich zum Hookless Laufrad SQUAD MTB 3.0 ist ab sofort auch das konventionelle Clincher Modell mit breiterer Felge und als Boost Standard erhältlich. Alle MTB Laufräder werden mit außenliegenden, selbstsichernden Nippeln geliefert.

## Squad Race

SQUAD Race is the new line of XeNTiS and replaces the XBL model range. These wheels are available in three different rim depths (25, 42 and 58 mm) and they are offered as clincher with integrated tubeless ready system and as tubular wheels.

The most innovative feature in comparison to the XBL line is the increase of the rim width to 26mm. Furthermore, we developed an asymmetric rim design which increase the lateral stiffness significantly.

Due to a cooperation with DT Swiss, the customer can choose between rim and disc brake (centerlock) from the Swiss quality manufacturer.

## Relaunch der Squad SL Serie

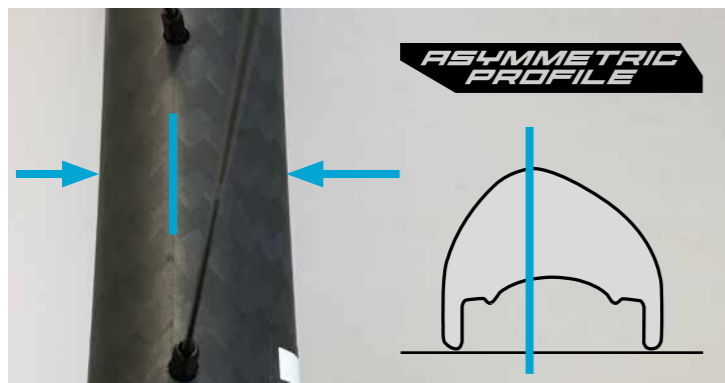

The SL wheels are available in four different rim depths (25, 42, 58 and 75 mm). All sizes are offered as clincher wheels with integrated tubeless ready system, the three lower ones are obtainable as tubular wheels as well.

Additionally to the in-house developed and manufactured XeNTiS carbon hub (front) a rear hub, produced by DT Swiss, is built in the wheel set.

To guarantee a simpler maintenance process the wheels are assembled with external nipples.

## Relaunch der Squad MTB 29er Serie

In addition to the hookless wheel SQUAD MTB 3.0 the conventional clincher model is obtainable with a wider rim and in combination with boost hubs. All MTB wheels are supplied with external nipples including an integrated threadlock system.

asymmetrisches Felgenprofil / asymmetric rim design

außenliegende, selbstsichernde Nippel / external nipples, integrated threadlock system

breitere Felge / wider rim

## XeNTiS Naben

Die XeNTiS Entwicklung beschränkt sich nicht nur auf die Produktion hochwertiger Carbonfelgen, sondern erstreckt sich auch auf die Entwicklung und Herstellung haus eigener Naben. Erweitert wird die Produktpalette durch die Zusammenarbeit mit DT Swiss.

Langzeittest, Prüfstandtest und letztendlich Renneinsätze, tragen zum Ergebnis bei.

## XeNTiS hubs

The XeNTiS development is not limited to the production of high quality carbon rims, but also extends to the development and manufacture of in-house hubs. The product range is extended by the cooperation with DT Swiss.

Long-term tests, bench testing and ultimately racing commitments contribute to the excellent results.

**XeNTiS** - cycling socks, breathable,  
 70% cotton, 21% lycra,  
 5% elasthan, 4% polyamid

**11004**  
**XeNTiS** - Fahrrad Handschuhe,  
 strapazierfähige, elastische  
 Obermaterialien

**11004**  
**XeNTiS** - cycling gloves, sturdy,  
 flexible upper materials

**XeNTIS**  
carbon technology

**HIGH-END WHEELS & MORE**

**Ihr Partner in allen Fragen zur Faserverbundwerkstoff-Technologie.**  
XeNTIS fertigt nicht nur Carbon Felgen für Laufräder, sondern auch verschiedene Sicht- und Strukturbauteile.  
Egal, welche Bauteile Sie realisieren wollen, wir freuen uns auf Ihre Anfrage.

**Your professional partner in fiber-reinforced composite technology.**  
XeNTIS does not only produce carbon rims for wheels, but also different cosmetic and structural components.  
Whatever component you would like to realize, please do not hesitate to contact us with your enquiry.

**XeNTIS**  
carbon wheel technology
