

# CASANOVA

Behind every model of the Battaglin collection, there are people who work every day with passion, looking for unmistakable shapes and details.

## Description

Casanova is the Battaglin road frame with a strong aerodynamic profile, providing the perfect balance of power transfer and stability to keep you flying in the final sprint, especially on flat terrain.

Developed in response to professional athletes' requirements about speed, Casanova reaches the pinnacle of the wind-cheating design and offers great handling.

Casanova brings on the road a total inclination to the sprinter's performance and it assimilates the maximum of the power that you can give to the pedals.

On first appearance the unique Battaglin's high-quality finish shows the snappy and reactive feel you can achieve only with a top-end Italian aero machine.

## Features
