## 0. UPDATES

The development of frames, forks and components is a continuous running process. Therefore we strongly advise before reading this information sheet check our website for new updates.

## 1. GENERAL

### 1.1. DESCRIPTION

Due to the unique design, the Liz is a multi purpose frame that can be used for recreational and competitive riding. The oversized sharp edge tubing ensures a high level of stiffness and is extremely strong in all areas. The specially developed flex areas in the seat- and chain stays absorb vibrations from the road to give the rider the right amount of comfort. The Liz geometry is especially designed for women. It has a shorter top tube and taller head tube for a more balanced riding position.

### 1.2. PART CODES

All the Liz frames have a particular part code composed by the letters "FRALICRID...", added by 3 numbers. The three numbers, depending on the design and size of the frame. Due to the big amount of frames we don't list all the numbers but you can contact your local dealer for more information if needed.

## 2. MATERIAL

Used frame materials:

- 24 ton High Modulus Carbon
- Stainless steel (drop out protection plates)
